

CREM®
EXPOBAR SINCE 1985

EX3

EXCEEDS EXPECTATIONS

Thanks to its modular design and a wide range of technical and aesthetic options, the EX3 can meet the expectations of any coffee establishment.

The EX3's design focuses on a contemporary, stylish, and easily customisable body. Internally, it features familiar Expobar parts, enhanced with PID and shot timer electronics. Your technicians will appreciate the new internal layout and the excellent accessibility for quick servicing.

The standard EX3 body comes in satin black with chrome feet, whilst the outer panels can be custom-painted to a colour of your choice, or you can opt for a stylish wood kit.
